

WHAT'S UP

The 26 kilometre water transmission line that the Town is building will run from Aquatera's Water Treatment Plant in Grande Prairie to the Town of Wembley. The construction is right on schedule; with a planned commission date in Spring 2019.

As of January 1, 2019 we will be providing water and July 1, 2019 we will be providing wastewater services.

You're going to get a monthly bill from us starting January 1, 2019. This bill will include your water, wastewater and garbage collection charges.

This will be simpler for you and us; also saving paper, postage and paper cuts.

WHAT'S NOT CHANGING?

Your Meters

We will continue to use the water meters that were installed in 2016, which are good for at least 20 years.

Your Rates

The water rates you pay now are the same rates Aquatera charges to all our customers.

Solid Waste Services

Your garbage and recycling will still be provided by the Town.
