

WAPITI RIVER BANK STABILIZATION/BIOENGINEERING PROJECT

We ask that ATV motorists refrain from using the recreational trail along the top of the bank area so we can ensure safety and ideal conditions for bank stabilization.

Aquatera Pump Station
Restoration Area

Intakes #1 and #2

Intake #3

We also ask that boaters only use the south channel of the river to protect the restored areas and give the vegetation the best chance for success. If you're still unsure, highly visible signage is placed at the affected areas to guide you.
